- Instructions :**
- (1) All Questions are *compulsory*.
 - (2) Answer each next main Question on a new page.
 - (3) Illustrate your answers with neat sketches wherever necessary.
 - (4) Figures to the right indicate full marks.
 - (5) Assume suitable data, if necessary.

Marks

1. Attempt any FIVE of the following :

10

- (a) Define Big Data.
- (b) Explain Real-time analytics.
- (c) State any two features of Hadoop.
- (d) Explain the role of Name Node in HDFS.
- (e) State the use of HIVE.
- (f) Define RDD.
- (g) List Data frame operation.

2. Attempt any THREE of the following :

12

- (a) Describe data preparation of Big Data Analytics.
- (b) Describe mapping analytics flow to Big Data Stack.
- (c) Describe the characteristics of Data.
- (d) Explain any one domain specific examples of Big Data.

- 3. Attempt any THREE of the following : 12**
- (a) Explain the challenges with Big Data Analytics.
 - (b) Explain any Four analytics patterns.
 - (c) Difference between RDBMS versus Hadoop.
 - (d) Explain HIVE Data Types.
- 4. Attempt any THREE of the following : 12**
- (a) Describe classification of Big Data Analytics.
 - (b) Explain key advantage of Hadoop.
 - (c) Write syntax and example of HIVE Query Commands for following :
 - (1) Create Table
 - (2) Alter Table
 - (d) Describe Generic load & save function.
 - (e) Write a code for building spark SQL application to count the total number of WARN lines in the logs.txt file (assume appropriate log file)
- 5. Attempt any TWO of the following : 12**
- (a) Explain Big Data Stack in detail.
 - (b) Describe HIVE Architecture.
 - (c) Difference between Spark and Hadoop map reduce.
- 6. Attempt any TWO of the following : 12**
- (a) Describe Hadoop distributed file system.
 - (b) Explain HIVE file format.
 - (c) Describe Apache Spark Architecture.
-
